Profile

I am a Frontend Developer with 5 years of experience building web applications from the ground up. I help teams create maintainable products by applying solid architectural patterns in Angular and streamlining workflows with Nx. Recently, I've transitioned into owning base project setups and defining scalable structures while mentoring junior developers. My core expertise is rooted in the Angular/Nx ecosystem, and I am currently expanding into Next.js.

Experience

Angular Developer

Jun 2021 - Present

SectorQube • Kerala, India

Collaborated on mission-critical Angular applications within the Nx ecosystem, transitioning from a core feature developer on high-traffic public service platforms to spearheading architectural setups and mentoring junior developers for large-scale governmental projects.

- Spearhead the architectural setup and project structure for complex Nx monorepos, managing multiple distinct portals within a unified ecosystem.
- Engineered multi-layered reactive forms featuring complex validation and dynamic data-binding for sensitive personal and payment information.
- efine and implement unified shared libraries for reusable components, services, and state management to ensure consistency across separate application portals.
- Integrate a wide array of RESTful backend services to handle critical operations such as OCR data extraction and secure authentication.
- Implement robust internationalization (i18n) solutions using @ngx-translate and Transloco to support multi-language requirements.
- Bridge rich UI requirements with complex backend services to deliver performant and scalable web application modules.

- Mentor and collaborate with junior developers to implement core features, conduct code reviews, and maintain high coding standards.

Software Developer

Feb 2021 - Apr 2021

Chai Chai India • New Delhi, India

- Develop single page static website using WordPress.
- Manage servers for hosting various web applications and database.
- Develop a Full Stack Web Application for administration.

Software Developer

Mar 2019 - Aug 2020

Kriger Campus • New Delhi

Worked in various layers of web technologies from frontend development to backend development while tackling various challenges and finding solutions.

- Develop website using Angular 7
- Use Firebase SDK in website to implement authentication, fetch data, post data etc.
- Write code for Firebase backend / Cloud Functions.
- Write code for migrating Firebase data to MongoDB.
- Develop REST API using NodeJS, ExpressJS, Mongoose.
- Write supporting code for Database corrections and modifications.
- Participate in testing android application.
- Document test results, API list.

Education

Bachelor in Computer Applications

2020 - Invalid Date

Indira Gandhi National Open University

Professional Diploma in Digital Transformation in MEAN Stack: Web Development

2018 - 2018

NIIT

Certifications

Exam 480: Programming in HTML5 with JavaScript and CSS3

Microsoft

Awards & Honors

Certification of Excellence

Apr 2024

Mannai Corporation QPSC

In recognition of the outstanding performance and valuable contributions towards successful implementation and delivery of Host Country Entry Platform Technology Project for FIFA World Cup 2022"' Hayya Program
